Zebrafish: Methods for Assessing Drug Safety and Toxicity offers a practical guide for using zebrafish as a tool for toxicology studies. Consolidating key protocols and approaches to help researchers navigate the important and evolving field of zebrafish models for toxicity screening, this new title describes the methods for using the zebrafish as a model organism to assess compound-induced toxicity on all major organs. Individual chapters that concentrate on assays for each organ system are included and various analytical tools including microscopy, microplate readers, high content imaging systems, ECG, blood pressure monitors, high speed video and motion detectors are described. The Museum Environment, Second Edition deals with the behavior and conservation of the various classes of museum exhibit. This book is divided into six sections that provide museum specifications for conservation. This text highlights the three contributing factors in the deterioration and decay of museum exhibits, namely light, humidity, and air pollution. Each section describes the mechanism of deterioration and the appropriate "preventive conservation". The changes in this edition from the previous include the electronic hygrometry, fluorescent lamps, buffered cases, air conditioning systems, and data logging and control in historic buildings. This book is of great value to conservation researchers and museum workers. Trap Shooting Secrets takes you into the world where professionals reside. The expected luminance of the zodiacal light in the vicinity of the sun is evaluated by two different methods. It is shown that the corresponding polarization is rather great and is oriented toward the sun. It makes it possible to analyze the observed integral luminance of the sky background during the solar eclipse and to distinguish the zodiacal component.

Conservation of Easel Paintings is the first comprehensive text on the history, philosophy, and methods of treatment of easel paintings that combines both theory with practice. With contributions from an international group of experts and interviews with important artists, this volume provides an all-encompassing guide to necessary background knowledge in technical art history, artists' materials, scientific methods of examination and documentation, with sections that present varying approaches and methods for treatment, including consolidation, lining, cleaning, retouching, and varnishing. The book concludes with a section featuring issues of preventive conservation, storage, shipping, exhibition, lighting, safety issues, and public outreach.

Conservation of Easel Paintings is a crucial resource in the training of conservation students and will provide generations of practicing paintings conservators and interested art historians, curators, directors, collectors, dealers, artists, and students of art and art history with invaluable information and guidance. Now a single mother living in a hotel in midtown Manhattan with her two young children, Henry and Loretta, Vera does her best to protect and nurture them, despite her meager resources. Alone after failed marriages and with seemingly no hope for a career revival, she must rely on her inner strength to carry her through her exhausting days. While Vera works as a waitress in a Broadway diner to make ends meet, Henry and Loretta grow up in a dark, challenging world in which vagrants, pimps and drug dealers own the street corners, police turn a blind eye, and tourists avoid Times Square. But as life comes full circle and a resurrection of Broadway and midtown Manhattan begins, Vera and her children may be able to rise from the depths of despair and breathe life back into their dreams. Lights is a poignant, sweeping story of revival as a Broadway actress attempts to restore her hope, faith, and separate destinies for her family while living in a city marked by hate, ignorance, and poverty.

This key text presents students with a holistic view of the building design process, bridging the gap between the theory and practice of constructing and assembling buildings. Integrated Strategies in Architecture encourages and enables students to gain a sound understanding of the purpose of buildings, the specialisms that contribute and the available technology. Zunde and Bougdah thoroughly introduce and expose the concepts and technologies that underlie the design process, setting current design in context as part of an evolutionary process, exemplified through historic and contemporary models, and emphasizing the importance of applying a broad variety of technologies in the creation of successful buildings. Topics covered include: space planning, colour theory, communication, management, aesthetics, structures and environmental control. This essential text will greatly assist students of architecture and its technology, construction management and building surveying as well as practitioners as they strive to build better buildings. This book constitutes the thoroughly refereed post-conference proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2011, held in Stavanger, Norway, in September 2011. The 66 revised and extended full papers were carefully reviewed and selected from 124 papers presented at the conference. The papers are organized in 3 parts: production process, supply chain management, and strategy. They represent the breadth and complexity of topics in operations management, ranging from optimization and use of technology, management of organizations and networks, to

sustainable production and globalization. The authors use a broad range of methodological approaches spanning from grounded theory and qualitative methods, via a broad set of statistical methods to modeling and simulation techniques. Biannually since 1994, the European Conference on Product and Process Modelling in the Building and Construction Industry has provided a review of research, given valuable future work outlooks, and provided a communication platform for future co-operative research and development at both European and global levels. Industrialization, urbanization and agricultural intensification result in increased sediment loading and eutrophication of SE Asian coastal waters and associated deterioration of light availability to seagrasses inhabiting coastal water.; This work presents the results of a study. Different (internal and external) factors affecting the capacity of seagrasses to persist under long-term light reduction were studied in a series of field and laboratory experiments in Southern Philippines. Today's brides- and grooms-to-be have grown up inundated by world-class photography on the Internet, television, magazines, and social networking sites. Therefore, it's no surprise that these savvy, image-conscious consumers have high expectations when commissioning their engagement portraits. They want unique, innovative images that make them look great and reflect their personal style as individuals and as a couple. In this book, acclaimed photographers Bob and Dawn Davis show you how to rise to that lofty goal and deliver memorable, personalized images from each session. Covering the process from start to finish, you'll learn how to select locations, work with clients on their styling, get

great poses even from camera-shy subjects, and find (or create) amazing lighting indoors and out—all day long. Lighting diagrams paired with each final image selection, along with supporting image variations from the same session, make it easy to learn! On-location photographers are faced with ever-changing lighting conditions due to the time of day, the weather, or the surroundings, and this book explores how to evaluate, use, and shape the available light to get the best results in any situation. The book begins by showing photographers how to assess available light and exposure, providing information on the quality and characteristics of light and the necessary tools and techniques for measuring them. The guide then focuses on portable lighting solutions that a single photographer can use—with minimal or no assistance—to customize the given light, from on-camera flashes and monolights with battery packs to umbrellas, soft boxes, and LED video lights. Numerous examples of difficult lighting situations are offered, as well as the progression of different light sources used—both correctly and incorrectly—to capture the final photograph.
