Established in the 1940s to produce and sell domestic labour-saving devices, Kenwood has survived and evolved to become a British icon. It is high time

someone recorded (almost) everything they ever made, and put a date to it, so that future generations can make sense of what was happening in U.K. kitchens, in business, in industrial design and in manufacturing. The first item off the production line, the Turnover Toaster, was made by Roger Laurence and Kenneth Wood in 1947, and over a hundred separate domestic objects would follow over the next thirty years. Inside this book, you will find full-colour photographs, descriptions and original retail prices of these mixers, accessories and appliances, right up to the model A901 Chef, first launched in 1976. Among many others, this book covers the A100 Turnover Toaster, A200 Mixer, A700 Chef, A600 Activair, A701/A Chef, A724 Mk I and II Coffee Mills, A740 Juice Extractor, A500 Roto-Blend, A955 Kenmix Blender, A1212 Dishwasher, A520 Blender, A888 MatchMaker Rollers and A180 Sodastream. If you are a collector, historian, hobbyist, enthusiast, or just like looking at pictures of old domestic objects and lovely design, this book is for you. Inside: how they competed with the likes of Sunbeam, KitchenAid and Moulinex; from their origins in Woking to their current site in Havant; the expectations of women in the home from the 1950s, through the 1960s and into the 1970s; the restrictions upon food preparation and baking from the effects of rationing; the relative cost of these appliances to average earnings at the time; sexist advertisements; beautiful vintage kitchenware and kitchenalia; and much, much more! Building the South Side explores the struggle for influence that dominated the planning and development of Chicago's South Side during the Progressive Era. Robin F. Bachin examines the early days of the University of Chicago, Chicago's public parks, Comiskey Park, and the Black Belt to consider how community leaders looked to the physical design of the city to shape its culture and promote civic interaction. Bachin highlights how the creation of a local terrain of civic culture was a contested process, with the battle for cultural authority transforming urban politics and blurring the line between private and public space. In the process, universities, parks and playgrounds, and commercial entertainment districts emerged as alternative arenas of civic engagement. "Bachin incisively charts the development of key urban institutions and landscapes that helped constitute the messy vitality of Chicago's late nineteenth- and early twentieth-century public realm."—Daniel Bluestone, *Journal of American History* "This is an ambitious book filled with important insights about issues of public space and its use by urban residents. . . . It is thoughtful, very well written, and should be read and appreciated by anyone interested in Chicago or cities generally. It is also a gentle reminder that people are as important as structures and spaces in trying to understand urban development." —Maureen A. Flanagan, *American Historical Review* Contains "Records in review." Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop. If you're an active ham radio operator, you probably have a story about your first radio contact. Many hams remember that experience even more than their first license examination. Features country-by-country listings of long-, medium-, and shortwave stations by frequency, time, and language; an address book of worldwide TV stations; and maps of principal transmitter sites A guide to shortwave broadcasts in more than 100 countries. 1969 has been called the most eventful year in our history, and it's against the backdrop of Vietnam and anti-establishment culture that Brownie wrote his own history that year: he smoked his first joint, and got laid, both of those momentous events taking place in the sun and the mud at Woodstock. He also attended Alliance College, and while there was no war there, people died, victims of an evil crime network fronted by a fraternity house cook name Dandy Don. Brownie and his best friend become inextricably tangled in a web of crime, bribery, depravity, and degradation. From professors to ballplayers to strippers, Dandy Don ruins the lives of everyone he touches. Porchball is a story of loyalty, betrayal, and deception. Ultimately, it's the code by which the game of Porchball is played that rises above all other of life's principles. When a fraternity brother explains that no one cheats at the game, Brownie doesn't understand. It's simple. "Everyone is taken at their word," says the brother. "Everyone does the right thing."
