2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent

environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat. Provides information on the truck and specialty vehicles business, including: automotive industry trends and market research; mergers, acquisitions, globalization; automobile manufacturers; truck makers; makers of specialty vehicles such as RVs; automobile loans, insurance and other financial services; dealerships; and, components manufacturers. Plunkett's Companion to the Almanac of American Employers is the perfect complement to the highly-regarded main volume of The Almanac of American Employers. This mid-size firms companion book covers employers of all types from 100 to 2,500 employees in size (while the main volume covers companies of 2,500 or more employees). No other source provides this book's easy-to-understand comparisons of growth, corporate culture, salaries, benefits, pension plans and profit sharing at mid-size corporations. The book contains profiles of highly successful companies that are of vital importance to job-seekers of all types. It also enables readers to readily compare the growth potential and benefit plans of large employers. You'll see the financial record of each firm, along with the impact of earnings, sales and growth plans on each company's potential to provide a lucrative and lasting employment opportunity. Nearly five hundred of the most successful mid-size corporate employers in America are analyzed in this book. Tens of thousands of pieces of information, gathered from a wide variety of sources, have been researched for each corporation and are presented here in a unique form that can be easily understood by job seekers of all types. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling export of company names, human resources contacts, and addresses for mail merge and other uses. One legendary insect--enormous, white, and exceedingly rare--attracts trout of such size that they couldn't possibly exist in the world as we know it. But in Heywood's classic novel, such things can and do exist. Protagonist Bowie Rhodes, UPI reporter and expert fly fisherman, had learned of the snowfly early in his childhood. It hatches every seven to ten years, never on the same river twice, bringing to rise trout so huge they would have to have lived forty years or more; trout so wily that they never allow themselves to be caught--or even seen; trout so hungry for this fly that they will risk exposure to rise for the hatch. The snowfly is the sacred quest of the most obsessed trout hunters, existing--it seems--only in myth and in a lost manuscript. Rhodes's reporting brings him to such sites as the jungles of Vietnam, the labyrinth of Brezhnev's Soviet Union, and a poisoned Canadian wasteland of uranium mines. His hunt for the manuscript, meanwhile, takes him deep into his own heart of darkness. Richly imaginative and sensual, the world of The Snowfly has more mystery lurking beneath the surface waters than our own. Or does it? Introduces the sport of

snowmobile racing, discussing the equipment and tactics, race courses, necessary skills, and safety measures. *Nine Miles In* recounts the incredible adventures of Doug Garton, the first caretaker to ever live year round at beautiful and historic Webber Lake Ranch in the northern Sierra Nevada Mountains of California. Doug and his first and second wife endured fierce, isolating, yet stunningly beautiful winters. The property contains numerous historic buildings and sites, the most notable being the 1860s Webber Lake Hotel, an original stage stop and resort on the famed Hennes Pass Road. This self-made man narrates his nail-biting life and death rescues and close calls while taking the reader through twenty-five years of what times were like managing incredible Webber Lake Ranch. The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. Northern New York's Adirondack Park is a naturalist's wonderland of high peaks, plunging chasms, pristine waters, and stunning vistas. In this collection of columns from the popular series the Adirondack Almanack, author John Warren reveals another side of this charming land. Stories of bank robberies, the Ku Klux Klan, gambling, buried treasure, rattlesnakes, and earthquakes abound. Showing careful research and a panache for storytelling, Warren takes the mountain path less traveled, where locals and visitors alike will be surprised by the hidden gems of the Adirondacks.

Long respected as a manufacturer of sturdy agricultural machinery, the John Deere Company began in the 1960s to build a line of consumer products in a dedicated factory in Horicon, Wisconsin. Starting with a lawn and garden tractor in 1963, Deere soon entered the fast-growing snowmobile market, introducing two models in 1971. The next 13 years would see a succession of models as Deere vied against tough competitors in a weather-dependent market. This detailed history, written by two key participants in the snowmobile program, describes the development of John Deere snowmobiles from start to finish: the design and engineering decisions that shaped each important model; reception of the snowmobiles by consumers; the factory race teams; the introduction of front-engine and water-cooled models; the process of selecting engines and negotiating with suppliers, including when problems developed; and the snowmobiles' impact on product engineering. The text provides an inside view of Deere's Consumer Products Division at a time of rapid growth, and of the people and processes that made it all happen.

Tired of the same old tourist traps? Whether you're a visitor or a local looking for something different, let Minnesota Off the Beaten Path show you the North Star State you never knew existed. Ski, hike, or just relax at the Eagle Bluff Environmental Learning Center; visit a three-billion-year-old rock in Yellow Medicine County; or fill up at the world's only Frank Lloyd Wright-designed service station in Carlton County. So if you've "been there, done that" one too many times, get off the main road and venture Off the Beaten Path. Since the 1960s, Ky Michaelson's rocket-powered vehicles have set 72 state, national, and international speed records. His penchant for the unknown and passion

for speed have been with him since childhood, when he built his first rocket-powered motorcycle. After earning his first world record--for a rocket-powered snowmobile--he decided to go after every acceleration record in the world. This is Ky's story, the life of a driven--or rocket-powered--man. Ky tells about how he began and where hes gone, about his work on hundreds of film and television programs, and about his service as program director of "SPACESHOT 2004"--the grand effort of the Civilian Space Exploration Team (CSXT) to build and launch the first amateur rocket into space. And he describes reaching the "impossible dream" as the first amateur to license, and successfully launch, the Go Fast Rocket into space, with an altitude of 72 miles--and a new speed record of 3,420 mph. This book will cut timely research out of your day by putting the latest review and analysis on franchise and distribution law at your fingertips.
