Structural Failure and Plasticity Feb 06 2021 As mankind continues to push back the boundaries and begins to explore other worlds and the ocean depths, a thorough understanding of how structures behave when subjected to extremes in temperature, pressure, and high loading rates will be essential. This symposium provided the perfect forum for presenting research into structures subjected to such extreme loads. There were a large number of papers presented under topics of impact, blast and shock loading, indicating a strong research interest in high rates of loading. Similarly new topics have been added to the traditional symposium list such as fire loading, earthquake loading, and fatigue and connection failures. It is clear now that fundamental knowledge of plastic deformation of structures to various extreme loads is coming of age. Each full paper was peer reviewed by at least two experts in the field.

Muddy People Apr 30 2020 A hilarious, heartwarming memoir of growing up and becoming yourself in an Egyptian Muslim family Soos is coming of age in a household with a lot of rules. No bikinis, despite the Queensland heat. No boys, unless he's Muslim. And no life insurance, not even when her father gets cancer. Soos is trying to balance her parents' strict decrees with having friendships, crushes and the freedom to develop her own values. With each rule Soos comes up against, she is forced to choose between doing what her parents say is right and following her instincts. When her family falls apart, she comes to see her parents as flawed, their morals based on a muddy logic. But she will also learn that they are her strongest defenders Sara El Sayed was born in Alexandria, Egypt. She has a Master of Fine Arts and works at Queensland University of Technology. Her work features in the anthologies Growing Up African in Australia and Arab, Australian, Other, among other places. She is a recipient of a Queensland Writers Fellowship and was a finalist for the 2020 Queensland Premier's Young Writers and Publishers Award. Muddy People is her first book. 'It takes courage to write a memoir, but more than that it takes heart, and Sara El Sayed's heart is generous and expansive. I gasped in recognition, I teared up in solidarity and I exhaled in relief - finally, a personal story that reflects so much that is familiar but is rarely found on bookshelves. This is the kind of memoir I have searched for in vain for years. Sara El Sayed has written a book both confident and delicate that will leave you eagerly awaiting her next. Read this!' —Mona Eltahawy, *The Seven Necessary Sins for Women and Girls* 'Muddy People is a nuanced, engaging and lyrical account of what it means to be Other in Australia, and its characters are impeccably drawn. Sara El Sayed is an enchanting and refreshing new voice in the Australian literary landscape.' —Maxine Beneba Clarke, author of *The Hate Race* 'A beautifully told story of parents and children, pain and loss, and the love that binds people together. Told with real heart and charm, it will keep you riveted from the first page. Sara El Sayed is the most important new Arab-Australian voice in literature today.' —Rohan Wilson, author of *The Roving Party* 'Sara El Sayed's writing is fresh, vibrant and dynamic. This is the kind of mud that will dirty your hands and cleanse your spirit.' —Michael Mohammed Ahmad, author of *The Lebs* 'Both cosmopolitan and Australian at the same time, Muddy People is like the best kind of cake: warm, sweet, a bit nutty - and made with so much love.' —Alice Pung, author of *Unpolished Gem* 'With elegant lyricism, compelling urgency and a dark sense of humour, Muddy People by Sara El Sayed is an impressive debut memoir ... El Sayed's coming to voice reflects her journey of self-realisation, of understanding what it means to be a migrant millennial.' —Books+Publishing

Understanding Green Business Mar 22 2022 Why Understanding Green Business? With every new day society has become more aware of the increasing threats to the globe due to the non-environmentally friendly practices that have been occurring in the previous years. Due to the newfound awareness, people have taken greater lengths to pass laws, alter company policies and change their everyday lives to do their part in helping to preserve the environment and prevent any further damage. Rather than taking the easy route and continuing their habits, society is putting forth a consciousness effort to go out of their way to improve the environment in any way they can. As a collective force the going green movement will better the environment and allow further generations to enjoy a clean and productive world. How is Understanding Green Business structured? Dr. Tehrani and Dr. Sinha dedicate each chapter to a different aspect of "going green" in this book such as products, transportation, networking, research and energy alternatives. In addition, the authors discuss green careers and provide useful information on how to go about working at a green company. The future of the green movement and its impacts are mentioned so as to provide a potential impact of current changes in the future. It also shows a possible interpretation of how the future green movement shall be exercised. Who is this book for? This book has been created as the core textbook for Business professionals, industry practitioners, academicians and students who would like to hone their business skills, and keep up with the latest trends in Green Business. As a result, Understanding Green Business will support students pursuing a master degree in MBA, Certificate in Management or a Diploma in Management and/or Business while undergraduate students in business programs.

Everyday Lifestyles and Sustainability Aug 15 2021 The impact of humanity on the earth overshoots the earth's bio-capacity to supply humanity's needs, meaning that people are living off earth's capital rather than its income. However, not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts. The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints. This leads to comparison and discussion of what living within the limits of the planet might mean. Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives. This book takes a 'bottom-up' approach by calculating the footprints of daily living. The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future. Offering a global perspective on the question of sustainable living, this book will be of great interest to anyone with a concern for the future, as well as students and researchers in environmental studies, human geography and development studies.

Fire Engines Aug 03 2020 More complex and imposing than any other vehicle in the British emergency services, the fire engine has a long and interesting history. The earliest water pumps had been developed by the eighteenth century - basic manual pumps that had to be hauled around by people or horses, and were often only used on fire-insured premises. In the nineteenth and twentieth centuries horse-drawn, steam-powered fire engines, and eventually motorised fire engines, came to revolutionise firefighting, offering far greater versatility and the brigades came to be run by the municipalities. In this beautifully illustrated introduction, Eddie Baker charts the history of fire engines and their variants, and the increasingly complex equipment they have carried, such as high-rise ladders and high-pressure hoses. He also explains the wider history of the fire service and how the engines have been shaped by its needs and, most importantly, those of the firefighters themselves.

Dark Country Jan 26 2020 Innocent lives threatened ... A corrupt enemy ... A country in crisis ... There's a saying among drug cartels: "Plata o plomo"—silver or lead. It's a concept Ryan Weller knows well, and when a group of American missionaries are taken hostage in the slums of Jalousie, Haiti, nothing comes closer to the truth. With the mission's CEO unable to meet the ransom, only one option remains: to issue a contract for their rescue. To protect their people, GOSPEL turns to an unconventional savior: Dark Water Research. Although the contracts remit is strictly salvation rather than salvage, Ryan and his team of veteran contractors are

the ideal solution—they know the turf, have the skills needed to recover the missionaries, and they know the right people in-country to help grease the wheels. But when Ryan learns there's more to one of the missionaries than first meets the eye, he's thrust headfirst into a pitched battle against a brutal drug smuggling operation. Headed by the elusive Mister Smith, the CIA-funded network provides a direct conduit to the heart of the United States' ravenous narcotics trade, and it's a venture Smith will move heaven and earth to protect. With Haiti reeling from their recent presidential assassination and its warlords and cartels continually vying for control of the island's streets, Smith relies on the chaos to keep his shipments on course and the money flowing to his unscrupulous pockets. For Haiti to thrive, Smith's network must fall—and Ryan Weller is a man determined to see it happen.
