This essential book offers a compelling and original interpretation of the rise of military aviation. Jeremy Black, one of the world's finest scholars of military history, provides a lucid analysis of the use of airpower over land and sea both during the two world wars and the more limited wars of the twentieth and twenty-first centuries. Considering both the theory and praxis of air power, the author begins with hot air balloons, and then highlights the use of zeppelins, piston engine fighters, jet bombers, and finally the so-called Military Revolution of today. While discussing the growth of American and European military aviation, Black, a pioneer in emphasizing the importance of non-Western military history for understanding global

developments, also traces the emergence of air power in Latin America, Africa, and Asia. Black breaks new ground by exploring not only to conventional war—both inside and outside Europe—but also to the use of air power in unconventional wars, especially critical given to the spread of insurgencies around the globe. He vividly describes traditional debates over the pros and cons of strategic bombing and aircraft carriers versus battleships and gives equal attention to managerial, doctrinal, and technological innovations. The author shows how better management resulted in increasing lethality of close air support of the RAF during the latter part of World War II and at the same times highlights the limits of air power with case studies of the two Gulf Wars. The author goes beyond our traditional understanding of air power associated with bombing and fighter engagements, adding the important elements associated with naval power, including ground/logistics support, anti-aircraft measures,

and political constraints. As he explains, air power has become Western politicians' weapon of choice, spreading maximum destruction with the minimum of commitment. His current and comprehensive study considers how we got to this point, and what the future has in store. Anyone seeking a balanced, accurate understanding of air power in history will find this book an essential introduction. The Small Arms Survey 2013 explores the many faces of armed violence outside the context of armed conflict. Chapters on the use of firearms in intimate partner violence, the evolution of gangs in Nicaragua, Italian organised crime groups, and trends in armed violence in South Africa describe the dynamics and effects of gun violence in the home and on the street. Many of the chapters in the 'weapons and markets' section zero in on the use of specific weapons by particular armed actors, such as drug-trafficking organisations and insurgents. These include chapters on the prices of arms and ammunition

at illicit markets in Lebanon, Pakistan and Somalia; illicit weapons recovered in Mexico and the Philippines; and the impacts of improvised explosive devices on civilians. Chapters on the Second Review Conference of the UN Programme of Action and the industrial demilitarisation industry round out the 2013 volume. The Indian Ocean's strategic importance to China cannot be underestimated, given the oil, African minerals and container traffic that pass through it. Not since Admiral Zheng He sailed his fleet through these waters in the fifteenth century -- exploring and mapping them in a bid to extend the Celestial Empire's trading and tributary system -- has China been present here. Beijing's re-entry into the Indian Ocean after 600 years is part of its Belt and Road megaproject, in which it is investing trillions of dollars in infrastructure projects around the Ocean rim and in Sri Lanka, Maldives, Seychelles and Mauritius, including a military base in Djibouti. This has touched off a new and

dangerous confrontation. Ranged against China is an informal alliance of India, the US, France, Australia, and, predictably, Japan, China's arch rival in the Asia-Pacific. China is in the Indian Ocean for the long haul and the entry of big-power politics into this sensitive maritime region will shape its future for decades. Bertil Lintner unearths this dramatic story, profiles the key players, examines the economic and naval balance of power and scrutinizes the intense competition to encourage small island nations to align with either New Delhi or Beijing.

SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 110,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD.

March 2022 issue. Vol. 100, No. 1 SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 110,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. March 2022 issue. Vol. 100, No. 2 Accompanied by annual issue in 1944. This book tackles the debate over nanotechnology's environmental health and safety (EHS) by thoroughly explaining EHS issues, financial implications, foreseeable risks (i.e. exposure, dose, hazards of nanomaterials), and the implications of occupational hygiene precautions and consumer protections. Real-world case studies are included, e.g. the discussion of a leading chemical company's unusual pairing with the USA's largest environmental NGO, and

an innovative program designed for small- to mid-sized businesses, which became a model approach for proactive nanotechnology EHS risk management. Considers the potential of nanotechnology from multiple perspectives (NGO, insurance industry, small business, etc) Provides guidance and advice for appropriate, proactive risk management strategies Reviews toxicological studies and industrial initiatives, documented with actual case studies Of significant interest to CEOs/CTOs of technology companies (SMEs), Health and Safety officers of technology companies (SMEs), Government officials (HSE), Toxicology experts, and venture capitalists Published in 1986: This book tells the story of how various persons and groups have successfully dealt with a type of problem which may threaten the lives and health of every group of humans - every community. The problem is that of a polluted environment. SURPLUS RECORD, is the leading independent business directory of new and used capital equipment,

machine tools, machinery, and industrial equipment, listing over 95,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. November 2022 issue. Vol. 99, No. 11 Since about 1980, asthma prevalence and asthma-related hospitalizations and deaths have increased substantially, especially among children. Of particular concern is the high mortality rate among African Americans with asthma. Recent studies have suggested that indoor exposuresâ€"to dust mites, cockroaches, mold, pet dander, tobacco smoke, and other biological and chemical pollutantsâ€"may influence the disease course of asthma. To ensure an appropriate response, public health and education officials have sought a science-based assessment of asthma and its relationship to indoor air exposures. Clearing the Air meets

this need. This book examines how indoor pollutants contribute to asthma—its causation, prevalence, triggering, and severity. The committee discusses asthma among the general population and in sensitive subpopulations including children, low-income individuals, and urban residents. Based on the most current findings, the book also evaluates the scientific

basis for mitigating the effects of indoor air pollutants implicated in asthma. The committee identifies priorities for public health policy, public education outreach, preventive intervention, and further research. Vols. for 1970-71 includes manufacturers' catalogs.
